## Precisely What You Need, in the Field or in the Shop

Our ability to reverse-engineer OEM replacement parts with precision up to 4 decimal points means that your equipment can continue to perform at the high level you expect.

To ensure the quality of all your components, we test them on our Coordinate Measuring Machines (CMM).

We're also prepared to help you with **re-builds, repairs and component exchanges**. Our superior combination of highly-trained technicians, parts inventory and personalized service allows us to complete jobs quickly, accurately and cost-effectively so you can get back to business.

At Irwin Mine and Tunneling Supply, we've worked in the mines, so we know the pressures you face. Most important, we're able to help you reduce them with our engineering and mechanical expertise, commitment to quality and attention to detail.

## The Irwin Difference

Irwin Car and Equipment engineers and manufactures custom heavy-duty material handling equipment for a wide array of industries and applications. The company's mining-related products include low-boy carrier cars, supply cars, roof transport cars, ballast cars, belt winders, constant tension winches, mobile mine ventilation systems, rock duster systems, drills, locomotives, personnel carriers, hydraulic filter systems and filter elements. Irwin's products for industrial applications include locomotives, transfer cars, furnace cars, ladle and scrap cars, scale cars, turntables, wheels, wheel assemblies, crane wheels and sheaves, rubber-tired steerable trailers, transporters, light-rail track/signaling devices and AGVs. Irwin Car and Equipment has been in business for more than 120 years and is headquartered in Irwin, PA, just 25 miles from Pittsburgh.
