

Atlas Car Products

Offering Freedom of Choice in Captive Rail Service

Industrial Rail Cars

Truck Assemblies, Repairs & Re-Builds

Drive and Idler Wheel Sets

Heavy-Duty Turntables

Stocked Car and Truck Parts

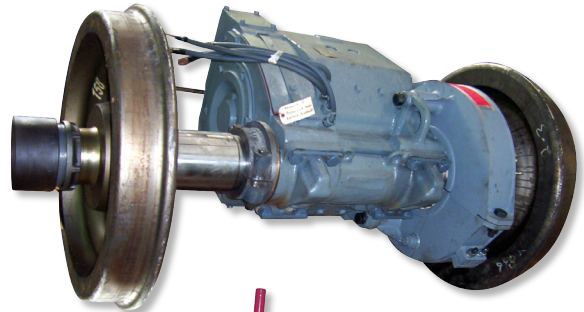

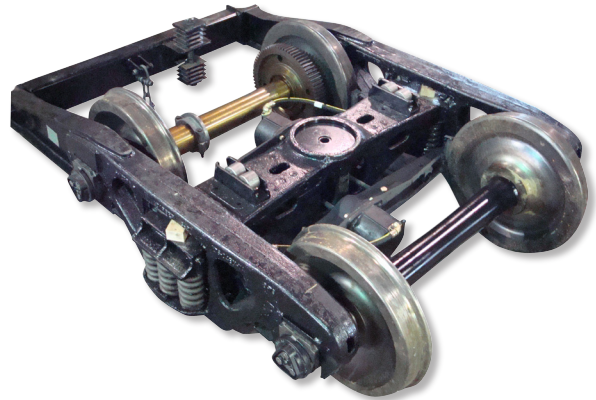

Turn to the experts at Atlas Car to keep your operations on track. Atlas Car has more than 100 years of experience in designing and manufacturing a variety of custom rail-based material handling equipment for leading companies worldwide. You'll find Atlas products in steel mills, mines and coke plants around the world. Rely on Atlas to maintain, replace or upgrade your mobile equipment, from Scale Cars to Quench Cars, Ladle Cars to Locomotives and Truck Assemblies to Turntables.

Atlas offers a Truck Assembly Repair and Rebuild Program to help keep your rail cars and locomotives on the job. With a truck repair and motor shop located at the same site, drive wheel assemblies and traction motors can be assembled to OEM specifications and fits. Our extensive inventory of truck and car components helps to decrease maintenance cost and downtime on repairs done at our facility or in the field.

Atlas Turntables are custom designed, and their welded steel construction makes them ideal for heavy-duty load requirements. Turntables come in four basic types:

- Raised top
- Flat top
- Flush top
- Bridge style

They can be powered or manually rotated, mounted above the floor or in a pit, and located indoors or outside.
