

# Stay On-Track!

*No two underground mines have identical conditions. That's why Irwin Car and Equipment has the ability to customize every diesel mining vehicle we manufacture.*

*Diesel Locomotive*

## Solutions for Production

To maximize uptime, we design our drive trains exclusively to move your locomotive up and down the track. In contrast, competitors purchase drive trains made for construction equipment and front-end loaders, and re-work them for locomotives. The result is inconsistent performance that reduces productivity.

### Other features & benefits include:

- Easily accessible dry disc brake systems that don't require major disassembly
- Suspension systems that provide maximum trackability
- Maintenance-friendly machine design
- Ergonomic cab design for maximum comfort, safety and visibility
- State-of-the-art electronically-controlled diesel engines that deliver maximum power from start to stop
- Onboard heavy-duty re-railers

When you depend on Irwin Car and Equipment for your locomotive requirements, you get the performance you need to stay competitive.

We also manufacture a complete line of personnel carriers for maximum comfort on every shift.

*(See Diesel Personnel Carriers on back)*

# A Smooth Ride from Beginning to End

*Our diesel personnel carriers feature superior suspension systems that decrease shock load and maximize the comfort of every ride.*

*Diesel Personnel Carrier*

## Other key features & benefits include:

- Easily accessible dry disc brake systems that don't require major disassembly
- Suspension systems that provide maximum trackability
- Maintenance-friendly machine design
- Ergonomic cab design for maximum comfort, safety and visibility
- State-of-the-art electronically-controlled diesel engines that deliver maximum power from start to stop
- Onboard heavy-duty re-railers
- Ergonomically-designed seating with lumbar support to reduce fatigue

At Irwin Car and Equipment, we pride ourselves on designing and manufacturing personnel carriers that help to significantly reduce workplace injuries, minimize time off and increase productivity
